

# Food Summit 2018 Joint Statement

28<sup>th</sup> of July, 2018  
Nakamura Gakuen Girls' High School

## I . Introduction

Over 2.1 billion people worldwide lack access to water. If we do not establish solutions to improve the condition, the number will increase significantly. As the global population is increasing and more people pollute the environment, the resource availability will deteriorate. The solutions that we proposed would be able to change the people, the community, and the world. Creating change in the habits of people will empower them to bring change to the perishing world

## II . Our Proposal

### 1 ) Current Issues

1. Water scarcity
2. Water pollution
3. Lack of education and awareness about water scarcity issues
4. Irrational use of resources

### 2 ) Proposal of Solutions

1. Use natural water resources
2. Reduce food waste can save water
3. Create innovative ways to purify water
4. Reduce the amount of waste companies dispose in water
5. Allow more people to be educated about managing resources
6. Encourage people to change their habits

### 3 ) Action Plan

1. Establish companies specializing on purifying rain water
2. Use the internet and offline resources to promote methods to reduce water and food waste
3. Communicate with organizations, and distribute water purification devices

4. Gather people worldwide in various forms including summits to discuss about measures to solve the water scarcity issues
5. Make a core university level course that educates teachers about global issues related to resources
6. Create half-semester courses that educates students about Health and resource management
7. Encourage students, especially in primary school, to build healthy habits related to managing resources through both in- and out-of school activities
8. Encourage celebrities to bring up resource scarcity issues and become “role models” of the society

### III. Conclusion

Having analyzed the global problems concerning food and water, we came to the conclusion that everyone should be involved in the process of implementing the solutions that we established to this global issue. We do believe that this mission is something that should concern companies and government systems as well as the whole community considering the power and enthusiasm of every single person.
